

# AT&T Workforce Manager for Mobile Assets

The unknown can be dangerous, especially in the business realm. When it comes to protecting mobile assets, business owners should always have clarity and understanding regarding their high-value equipment. Our sophisticated business solutions platform provides clarity by making it possible to set alerts that keep business owners aware of their mobile asset's statuses. We implement intuitive and user-friendly technology to help curb losses and increase peace of mind.

## We make it possible to business owners to:

- Maintain complete visibility to current locations of high-value mobile assets from cellphone, tablet or vehicle mounted devices
- Receive near real-time updates daily, alerting system administrators of whenever mobile assets move, or any other instance you dictate
- When fast track is enabled for a device, tracking is done automatically every 5 minutes. When fast track is dormant, devices track once daily
