

# Event-based Tracking

## Know the location of employees in the field at a glance

In any industry, the workday can be riddled with the unforeseen regarding your workforce. Things happen in the field and administrators need a way to monitor what workers are doing and where they operate from, once they leave the office. Track and monitor individual activities in the field and unique data entries in near real-time. Our software employs an intuitive, yet user-friendly web dashboard that displays user events as they happen. View GPS locations for any event to increase overall company accountability.

### Key Features

- Create dynamic, effective business workflows
- Increase productivity in the field by monitoring employee activity patterns
- Oversee day-to-day events on the dashboard

Event-based tracking provides users peace of mind by optimizing your workflow processes. Monitoring field activities paints a clearer picture when it comes to accountability and productivity in the field. Event-based tracking increases efficiency by keeping track of the hours that employees log via their mobile devices. The software also reveals the locations that each and every event occurred at. Our software provides the data needed to monitor your workforce as they complete jobs from various locations. The more you know about your workforce, the more you intelligently you can allocate your resources.
